

oneVAULT | Online Backup and Restore

Advantages for You

Ease of deployment | Automated client installation across all leading operating systems and network configurations

Centralized control | View backup sets from one interface that integrates with our oneCARE+ (remote monitoring and management) services.

Scalability | Enable bandwidth and storage space conservation so growing storage requirements can be met affordably.

High demand | Affordable solution for virtually any industry that requires secure, cost-effective data storage and rapid retrieval.

Key Features

- Centralized, automated backup of PCs, file servers and application/database servers
- Immediate recovery process for quick online data restoration
- Agentless backup software, for easy installations
- Common file elimination and compression to ensure bandwidth and storage requirements are minimized
- Open file management that enables backup of almost any file
- Securely transmitted data at encryption levels exceeding standard government and banking requirements

DATA PROTECTION FOR YOUR BUSINESS

Reliable, secure backup and restore capabilities are crucial to all businesses, but traditional methods of data backup have often proven cumbersome, time consuming and costly. Now you can solve this problem with an affordable, easily managed and easily deployed solution by FusionOne. Our Online Backup and Restore solution is automated and gives you peace of mind knowing that your data is now secure.

On-demand Data Restoration

Lost files and computer downtime caused by user error and corrupted tape drives occur regularly and are the source of significant — but often hidden — business costs. In addition, restoring data from tape can take an inordinate amount of time and sometimes even fail, causing a direct impact to the business. FusionOne's Online Backup and Restore ensures that your crucial data can be restored quickly, easily and on demand.

A Solution You Can Trust

Many companies trust the backup of their data to a fragmented and often ineffective policy of distributed tape devices, manual routines and off-site tape storage. Our Online Backup and Restore solution provides a unique, automatic, safe approach to data storage by offering:

- A fully automated process with backups saved on disk for rapid file restoration
- Secure online transfer of fully encrypted data to an off-site data center, ensuring regular backups are stored safely and remotely
- Automated alert if backup fails

By choosing FusionOne's Online Backup and Restore as your managed services offering, you'll benefit from its ease of use, efficiency, and ability to improve customer service levels.

For more information about FusionOne's Online Backup and Restore or any of the other hosted options, visit www.fusionone.ca or call the FusionOne team at 416-637-1156.
